

A edge distance

$$d(C_i, C_{i+1}) = \max_n \|p_n^i - p_n^{i+1}\|$$

B accumulated path cost

$$c_i = d(C_i, C_{i+1}) + \alpha_{\text{def}} E_{\text{def}}(C_{i+1}, C_i)$$

$$J(P) = \sum_i c_i$$
